

### *Marquis ornamental bar fence*

The Marquis ornamental bar fence is constructed from a steel frame with welded vertical bars. The upper and lower beams are made of full flat iron strips. The bars pass through the upper and lower beams and have an elegant spearhead on top. Between the bars, smaller bars are added, having a French lily on top and a finishing beam of flat iron. The steel frames are attached to the posts with corrosion free bolts.

The Marquis ornamental bar fence is fully galvanized and has a polyester powder coating. This way, the fence has a high resistance against corrosion. Moreover, the colour of the fence can be chosen in a way that the fence fits perfectly in the environment. Kopal offers a number of standard colours, but it is also possible to choose an own, specific RAL color for the Marquis ornamental bar fence

# Marquis bar fence

## Posts

The posts are made of steel profiles of 60/60/2 mm and are placed at a distance of 2.00 meters (axis on axis) of each other. They are finished with a plastic cap on top. Each post has 2 welded tabs for the mounting of the Marquis panels that are fixed using 4 bolts M8.

## Marquis panels

The Marquis panels are made of three flat iron strips of 45/8 mm and round bars at an interleave of 15 cm (a.o.a.). The bars pass through the upper and lower beams and have an ornate spearhead on top. Between the bars, smaller bars are added, having a French lily on top and a finishing beam of flat iron. The Marquis panels are hot dip galvanized and can have a polyester coating in a standard Kopal colour. Other colours are available on demand.

Height Marquis panel (m)	Post length (m)	Post on base plate length (m)
1.50	2.30	1.50
1.70	2.50	1.70
2.20	3.00	2.20
