

### *Prince swing gate*

The Prince swing gate is the top model in the Kopal series of ornamental gates. This gate has all accessories:

- Bars
- Spearheads
- Extra bars
- Decorative rings

The bars in the Prince swing gate have a spear point on top. The soldered extra bars are made of solid steel rod and have a French lily on top. The bars are finished with a solid flat. In the old days, the extra bars served to keep small domestic animals inside. Nowadays they have a more decorative function.

The flowing form 'chapeau Napoléon' runs from the center to the sides with a height decrease of about 30 cm. Each wing has a solid ground bolt to lock the wing in open or closed position.

For the Prince swing gate one can obtain similar fencing panels, so a visually appealing fence can be created.

# Prince swing gate

## Posts

The posts of the Prince swing gate are square steel tubes measuring 120/120 mm. The length of the post equals the height of the wing + ground gap (10 cm) + 80 cm.

## Frame

The frame of the Prince swing gate is made of square steel tubes measuring 50/50/2 mm, flat profiles measuring 45/8 mm, round bars having a diameter of 22 mm, smaller bars with a diameter of 12 mm and ornamental rings having a diameter of 126 mm. The upper side is finished with two parallel flowing flat profiles. The bars pass through the lower beam and through the upper flat profiles. They are cut straight at the bottom and have a spearhead on top. They are placed at a distance of 15 cm a.o.a. Between the bars smaller bars are applied to a height of 59.5 cm. These little bars have a diameter of 12 mm and are finished with an ornamental point in the form of a French lily. On top between the bars and between the flat profiles, ornamental rings are applied.

## Locking system

Lock box with cylinder lock having a day and night lock, including 3 keys. 1 ground bolt per wing.

## Finishing

Hot dip galvanized and coated with a polyester powder coating in a standard Kopal colour. Other colours are available on demand. All accessories are made of inox or aluminium.
