

Alzebra swing gate

The Alzebra swing gate is made completely of aluminum, making it highly resistant to corrosion and giving it a very long service life. It is also a lot lighter than a gate made of steel, making it easier to open and close the gate. Add the hinges with ball bearings to this and you get a gate that is very light to handle. The hinges are adjustable and allow the gate to open at 180°.

The Alzebra swing gate is available with one or two wings, in which one can choose to place the lamellae horizontally or vertically. Thanks to the distance of 2.5 centimeters between the lamellae, the see-through level of the gate is gracefully limited and the gate gets a contemporary and graceful look.

The lock case with day/night locking system in combination with the solid ground bolts give the Alzebra a reassuring protection against intruders.

Alzebra

Posts

The posts of the Alzebra swing gate are square aluminum tubes measuring 120/130/3 mm, equipped with an aluminum cover. The length of the post equals the height of the wing + ground gap + 80 cm.

Frame

The frame of the Alzebra swing gate is made of square aluminum tubes with rounded corners measuring 60/60/3 mm. The hinges are adjustable in all directions and allow the gate to be opened at 180°. For the filling of the wings one can choose between horizontal and vertical lamellae. The lamellae in the Alzebra gate measure 120/30/2 mm, have rounded corners and are placed with a gap of 25 mm between each other.

Locking system

Lock box with cylinder lock having a day and night lock, including 3 keys. 1 ground bolt per wing.

Finishing

Pretreatment: degreasing, chemical scouring and chromatising. Then coated with a polyester powder coating in a standard Kopal colour. Other colours are available on demand. All accessories are made of inox or aluminum.

Standard heights Alzebra swing gate (m)	Standard widths single wing (m)	Standard widths double wing (m)
1.00	1.00	2.00
1.25	1.50	3.00
1.50	2.00	4.00
1.80	2.50	5.00
2.00	3.00	6.00
