

### Grace garden gate

The Grace garden gate by Kopal is a must for every garden. It offers safety for child and pet thanks to a simple but strong concept. The soldered mesh with openings of 100 x 50 mm looks light, but is very strong.

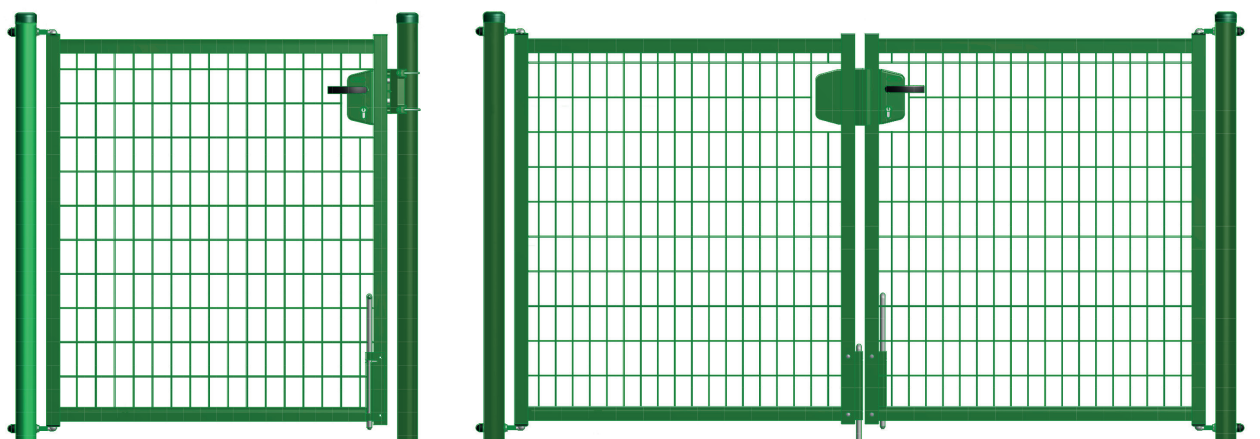

The upper and lower horizontal tubes are tunnel-shaped. This gives the Grace gate a more elegant look. At the same time, these tunnel shaped tubes avoid dust accumulating on the gate, which gives it a cleaner look.

The Grace gate has a locking case with cylinder and handle by default. It is available in different sizes, having one wing or double wing for larger passages. As an option, a ground bolt can be added.

The gate is available in the Kopal standard colours, but can also be delivered in a personalised RAL colour.

# Grace garden gate

## Posts

The posts are made of steel profiles of 60/2 mm and are finished with a plastic cap with a diameter of 60 mm on top. Each post has 2 adjustable garden gate hinges, made of stainless steel, that allow the wings to open by 180°. The length of the posts equals the height of the wing + the ground gap + 70 cm.

## Wings

The wings are made from steel tubes measuring 40/40 mm vertically and tunnel profiles measuring 41/35 mm horizontally. Between these, a welded steel mesh with meshes of 150 x 50 mm is welded. The wing height equals the gate height - 7 cm ground gap.

Standard heights Grace garden gate (m)	Standard widths single wing (m)	Standard widths double wing (m)
1.00	1.00	2.00
1.20	1.20	2.40
1.50	1.50	3.00
1.80	1.945	3.89
2.00		

## Locking system

Lock box with cylinder lock having a day and night lock, including 3 keys. As an option, the wings can be equipped with a ground bolt.

## Finish

Galvanized and coated with a polyester powder coating in a standard Kopal colour. Other colours are available on demand.

STANDARD COLOURS	RAL CODE	
moss green	RAL 6005
