

### *Chevalier swing gate*

The Chevalier swing gate from Kopal is a soberly conceived gate that fits anywhere. The flowing form 'chapeau Napoléon' runs from the center to the sides with a height decrease of about 30 cm.

The bars in the Chevalier swing gate are positioned at a distance of 15 cm from each other (axis to axis) and are finished with decorative spearheads. Each wing has a solid ground bolt to lock the wing in open or closed position.

For the Chevalier swing gate one can obtain similar fencing panels, so a visually appealing fence can be created.

# Chevalier swing gate

## Posts

The posts of the Chevalier swing gate are square steel tubes measuring 120/120 mm. The length of the post equals the height of the wing + ground gap (10 cm) + 80 cm.

## Frame

The frame of the Chevalier swing gate is made of square steel tubes measuring 50/50/2 mm, flat profiles measuring 45/8 mm and round bars having a diameter of 22 mm. The upper side is finished with two parallel flowing flat profiles. The bars pass through the lower beam and through the upper flat profiles. They are cut straight at the bottom and have a spearhead on top. They are placed at a distance of 15 cm a.o.a.

## Locking system

Lock box with cylinder lock having a day and night lock, including 3 keys. 1 ground bolt per wing.

## Finishing

Hot dip galvanized and coated with a polyester powder coating in a standard Kopal colour. Other colours are available on demand. All accessories are made of inox or aluminum.
