

Limator diamond shaped wire gauze

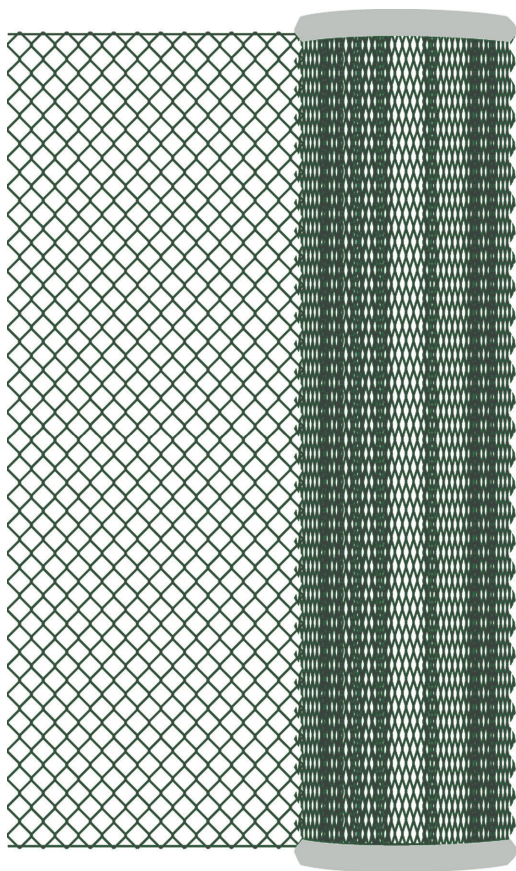

Limator is a diamond shaped wire gauze having a high dimensional stability. The gauze is placed on round poles, with or without upper tube, so that a rigid, straight fence is formed. Through the use of an upper tube, the fence can be used for covering with vegetation. Kopal has an extensive range of poles, tubes and accessories that allow for a perfectly appropriate fence for every application.

Limator is well protected against corrosion: The solid wires are galvanized and plasticized. This way, Limator has a double protection. The poles and accessories also are corrosion resistant, allowing the complete fence to have a long service life. By default, the Limator has a green plastification, though other colors are possible on request.

Limator is supplied in rolls of 25 meters, with brown winding tape and is wrapped in stretch film.

Limiter

Diamond shaped wire gauze, coated, compact rolled up and packed in stretch film. Upper and lower extremities are provided with brown winding tape.

Wire diameter	Core 2 mm, end diameter 3 mm
Galvanization	50 gr/m ²
Pulling resistance	650 to 850 N/mm ²
Roll length	25 meters

STANDARD COLOURS	RAL CODE	
moss green	RAL 6005	
stone gray	RAL 7030	
brillant black	RAL 9005	
Shown colours can differ from the true colours. Always use colour samples to choose your colour.		

Height (meters)	Mesh / wire core / finished (mm / Ø mm)	Weight / roll (kg)	Rolls / Pallet
1.00	50 / 2 / 3.1	34.25	16
1.25	50 / 2 / 3.1	34.68	16
1.50	50 / 2 / 3.1	39.00	16
1.80	50 / 2 / 3.1	46.80	16
2.00	50 / 2 / 3.1	52.00	16
1.00	40 / 2 / 3.1	35.25	16
3.00	40 / 2 / 3.1	52.57	16

Other meshes, wire diameters and colours are available on demand.
