

Prince ornamental bar fence

The Prince ornamental bar fence is constructed from a steel frame with welded vertical bars. The upper and lower beams are made of full flat iron strips. The bars pass through the upper and lower beams and have an elegant spearhead on top. Between the bars and between the upper beams, ornamental rings are welded. At the bottom, extra bars with a French lily on top are applied, finished by a flat iron strip. The steel frames are attached to the posts with corrosion free bolts.

The Prince ornamental bar fence is fully galvanized and has a polyester powder coating. This way, the fence has a high resistance against corrosion. Moreover, the colour of the fence can be chosen in a way that the fence fits perfectly in the environment. Kopal offers a number of standard colours, but it is also possible to choose an own, specific RAL color for the Prince ornamental bar fence.

Prince bar fence

Posts

The posts are made of steel profiles of 60/60/2 mm and are placed at a distance of 2.00 meters (axis on axis) of each other. They are finished with a plastic cap on top. Each post has 2 welded tabs for the mounting of the Prince panels that are fixed using 4 bolts M8.

Panel height Prince (m)	Post length (m)	Post on base plate length (m)
1.50	2.30	1.50
1.70	2.50	1.70
2.20	3.00	2.20

Prince panels

The Prince panels are made of three flat iron strips of 45/8 mm and round bars at an interleave of 15 cm (a.o.a.). The bars pass through the upper and lower beams and have an ornate spearhead on top. Between the bars and between the upper beams, ornamental rings are welded. At the bottom, extra bars with a French lily on top are applied, finished by a flat iron strip. The Prince panels are hot dip galvanised and can have a polyester coating in a standard Kopal colour. Other colours are available on demand.
