

Arena bar fence

The Arena bar fence is constructed from a steel frame with welded vertical square bars. The fence radiates robustness and safety. Arena is highly resistant to vandalism and is difficult to climb.

The square bars pass through the upper and lower beams, are turned by 45° in relation to the horizontal beams and are chamfered at 45° on top. The steel frames are attached to the posts with a special mounting piece that slides into the upper and lower beams.

The Arena bar fence is fully galvanized and has a polyester powder coating. This way, the fence has a high resistance against corrosion. Moreover, the colour of the fence can be chosen in a way that the fence fits perfectly in the environment.

Kopal offers a number of standard colours, but it is also possible to choose an own, specific RAL color for the Arena bar fence.

Arena bar fence

Posts

The posts are made of steel profiles of 60/60/2 mm and are placed at a distance of 3.01 meters (axis on axis) of each other. They are finished with a plastic cap on top. In each post 2 holes are predrilled to insert the fixing rods. The connexion system consists of a specially designed connection piece that is mounted in the extremities of the upper and lower beams.

Arena panels

The Arena panels are made of two tunnel-shaped profiles of 60/40/2 mm, and square bars between them at an interleave of 15 cm (a.o.a.). The square bars pass through the upper and lower beams, are turned by 45° in relation to the horizontal beams and are chamfered at 45° on top. The Arena panels are hot dip galvanised and can have a polyester coating in a standard Kopal colour. Other colours are available on demand.

Arena panel height (m)	Post length (m)	Post on socket length (m)
1.00	1.80	1.00
1.25	2.05	1.25
1.50	2.30	1.50
1.80	2.60	1.80
2.00	2.80	2.00
2.50	3.30	2.50

STANDARD COLOURS	RAL CODE	
moss green	RAL 6005
