

Jungle bar fence

The Jungle bar fence has a deterrent effect and thanks to its natural look, it can be perfectly integrated in an urban environment.

Thanks to the innovating concept and rigidity (the bars pass through the upper and lower beams) of the bar fence, all security requirements (CE standard) are meticulously respected.

The Jungle bar fence is mounted using plastic plugs in the beams and invisible bolts and nuts. It is available in all standard Kopal colours, but can also be supplied in a RAL colour of your choice.

Jungle bar fence

Posts

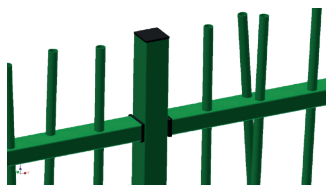

The posts are made of steel profiles of 60/60/2 mm and are placed at a distance of 2.75 meters (axis on axis) of each other. They are finished with a plastic cap on top. In each post 2 holes are predrilled to insert the fixing rods. The connexion system consists of a specially designed connection piece that is mounted in the extremities of the upper and lower beams.

Jungle panels

The Jungle panels are made of two profiles of 60/40/2 mm, and round bars between them at a maximum interleave of 110 mm. The bars pass through the upper (200 mm) and lower (100 mm) beams. The Jungle panels are galvanized (275 g/m²) and can have a polyester coating (minimum 80 µm) in a standard Kopal colour. Other colours are available on demand.

Fence height (m)	Height of Jungle panel (m)	Bar diameter (mm)	Post length (m)
1.25	1.15	22/1.5	1.80
1.50	1.40	22/1.5	2.05
1.80	1.70	22/1.5	2.30
2.00	1.90	22/1.5	2.80
2.50	2.40	25/1.5	3.30

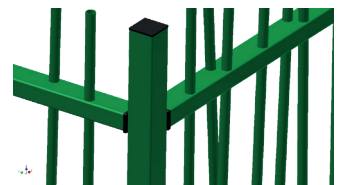

STANDARD COLOURS	RAL CODE
