

### *Rampo anti-ram post*

The Rampo anti ram post from Kopal is a steel post that can be used as a protection for corners or against ram raids. The post is ideal for protecting buildings, gates, machines and installations. It can also be used for shielding shop windows, entrances for pedestrians, etc..

The Rampo is available in 2 versions: with base plate for bolting it on a concrete floor or extended to pour it into concrete. The version with base plate is available in lengths of 0.6, 1.5 and 2.0 meters, where the extended version is available in 1.1, 2.0 and 2.5 meters.

The Rampo anti ram post from Kopal is fully galvanized and can be coated with a powder coating in a RAL colour of choice.
