

### *MEUHH pasture gate*

The MEUHH pasture gate is a sturdy steel construction which is calculated for stopping larger animals such as cows, horses, but also smaller animals such as sheep, lambs,...

The MEUHH gate is intended to be built into existing enclosures, but can also be supplied with its own support and stroke posts.

The MEUHH pasture gate is hot dip galvanized and is therefore extremely resistant to corrosion. The gate may additionally be provided with a polyester powder coating, which still increases the corrosion resistance (option).

# MEUHH pasture gate

## Frame

The MEUHH is a solid gate frame made of tube profile with diagonal reinforcements. The upper and lower girders are rectangular tubes of 60/40/2 mm, the vertical tubes are 50/50/2 mm. From a gate width of 3 meters a central reinforcement is inserted, made from flat iron of 45/8 mm, as well as diagonal tension rods from flat iron of 20/5 mm. The horizontal intermediate girders are thick-walled round tubes having a diameter of 30 mm. The lower 4 girders are placed at a distance of 15 cm a.o.a., The upper 2 at a distance of 20 cm a.o.a. The gate wing is interchangeable left-right.

## Posts

The MEUHH gate can be supplied with optional Unipost posts of 120/120 mm, having a post length of 2 meters.

## Locking

The gate has 2 sliding bolts (1 on top and 1 at the bottom), provided on the hinge side are two eye bolts M20 x 130.

Hauteur standard (m)	Largeurs standard (m)
1.20	1.00
	3.00
	3.50
	4.00

## Finish

The MEUHH pasture gate is fully hot dip galvanized and can be optionally equipped with a polyester powder coating of 80 microns, in a standard Kopal colour or RAL colour of choice (option).

## Accessories

The MEUHH gate can be provided with special hinge brackets and stroke brackets for mounting on existing concrete posts of 120/120 mm.
