

Jungle swing gate

The single or double swing gate Jungle from Kopal has been specially developed for integration in a fence built from Jungle panels. It is of course also possible to use the gate separately, without Jungle fencing.

Thanks to the construction with bars that go through the horizontal profiles, the jungle swing gate is very robust en respects all security demands (CE-directive). Due to the apparently random placed bars, the gate has a natural and beautiful look.

The Jungle swing gate is galvanized and can be obtained in all standard Kopal colors. Other RAL colors are available on demand.

Jungle swing gate

Frame

The frame of the Jungle swing gate is made of vertical square steel tubes of 60/60/2 mm, horizontal tubes of 60/40/2 mm and bars that are positioned in an identical way as in the Jungle bar fence. The bars have a diameter of 22/1.5 mm and are mounted at a distance of maximum 110 mm from each other (CE directive). The bars pass through the upper beam by 200 mm and through the lower beam by 100 mm).

Posts

The posts for the Jungle swing gate are square tubular profiles of 80/80/3 mm to maximum 100/100/3 mm, depending on the size of the gate. They are fixed in the ground by 80 cm and are fixed by concrete. The reception post is maximum 120/120/3 mm. The gate wings are mounted using adjustable hinges M20 that facilitate an opening of 180°.

Locking system

Lock box with cylinder lock having a day and night lock, including 3 keys. 1 ground bolt adjustable in height.

Finishing

Hot dip galvanized and coated with a polyester powder coating in a standard Kopal colour. Other colours are available on demand.
